EXPERIENCE

Nuclei

Feb 2024 – Present

Associate System Engineer (DevOps)

- Built and managed AWS infrastructure from scratch for a new client, including servers, databases, networking, monitoring, logging and disaster recovery setup.
- Currently working on setting up infra with Oracle Cloud.
- Deployed and managed applications using Kubernetes, including cluster setup, scaling, and resource management.
- Set up and maintained DevOps pipelines, migrated CI/CD from Jenkins to GitHub Actions for smoother, faster deployments.
- Managed databases, including setup, replication, automated backup, and restoration. Implemented service mesh solutions utilizing Istio and Envoy for improved microservices communication.
- Configured Nginx, along with security tools (IDS and IPS) like Suricata, for enhanced network protection.
- Designed and managed logging and monitoring stacks, including OpenSearch, Fluentd, Fluent Bit, Prometheus, and Grafana.
- Assisted in developing user documentation and training materials for end-users.
- Quickly adapted to new technologies and took end-to-end ownership beyond the expectations of an Associate System Engineer role.
